Sales data: colors for sub-anodized printing

Packaging

The colors are delivered in packing containers of hard polyethylene.

Minimum order amount

The smallest possible volume is 1 kg.

Delivery

For us, customer service means a transparent flow of information.
Please ask us about costs for packaging and shipping to your destination.

Express delivery

Do you require express delivery? No problem, just let us know and we organise the courier service of your choice, e.g. TNT, DHL, etc.

Advice

Questions regarding ALGRA Dynacolor? Our specialists are here for you and will be pleased to help.

Safety

Please also read the safety data sheets for the colors. These can be found under www.algra.ch (Downloads Printing methods) or on request. These safety data sheets are also included when you purchase ALGRA-colors.

Deviations in the color shade

Please note that the color shade is not 100% the same on paper as on aluminium.
We would be pleased to send you original color samples on request.
In addition, due to differences in material properties, small differences between sheets may occur.

Light fastness

Information regarding light fastness plus further information can be found in our Dynacolor brochure. These can be found at www.algra.ch (heading Downloads, then Dynacolor) or on request.
